LOCATION AND HISTORY

Cultuur Haven Veghel, a highly inspirational industrial venue

Situated in the heart of Brabant you will find this industrial and widely applicable event venue, on 'the Noordkade' in Veghel. This venue offers various places for rent that provide the perfect setting for a possible congress, business meeting, dinner, drink or business party. The venues display a robust appearance. A lot of original elements such as unpolished walls, roof constructions and machines were preserved during the renovation. The venues measure up to the modern requirements, but nevertheless make you feel like you are back in time.

The rich history of the Noordkade goes all the way back to the beginning of the 20th century. That was the time Veghel opened its own port and the place where in 1915 the first buildings of the Coöperatieve Handelsvereniging arose, that later on became the biggest cattle feed factory of Europe. Nowadays these buildings are for monumental purpose as the industrial purpose has disappeared, but the ambiance is certainly maintained. These days the complex consists of, among other things, a contemporary theater, inspiring event venues and a unique culture café.

When you enter the **Koekbouw**, it is impossible not to be impressed by this imposing place. Old elements are combined with the comfort of today. The fine incidence of light, the robust walls, the authentic factory lighting and the internal crane track that still adorn the interior, are responsible for the rough appearance and make you feel as if you are back in time. Equipped with a multifunctional walkway that covers the full length of the room and its own café, which can be reached by using the aforementioned walkway, the koekbouw provides you with all conveniences. The 100 years old Koekbouw was originally a warehouse for cattle cakes. Today it is a characteristic hall that is used for expositions, dinners, dance events, company parties and conventions.

MALERIJ

The industrial inner garden of the Noordkade exudes history. In the attic of the [Malerij](#) you are able to admire the impressive storage silos and the large mixing machines which complete the Malerij. It is just a sample of the industrial heritage that has been preserved when the old factory was repurposed. The Malerij is, among other things, suitable for drinks, parties and fairs, but because of its central position within the factory it is also perfectly suited as a plenary foyer for larger events.

"The building is heated with residual heat from DMV International. Such a sustainability!"

WALSMALERIJ III

The concrete construction and open structure of the ceiling make [Walsmalerij III](#) an inspiring venue for the more intimate conferences, presentations and workshops. In the former storage area, many details are visible of the traditional way of constructing concrete structures. Walsmalerij III conveys, just like most venues at Cultuur Haven Veghel, an 'urban' look.

facilities

- underfloor heating and daylight

NPF TOREN

Hidden in the heart of the building is certainly one of the most impressive areas of the factory, the **NPF Toren**. With the imposing steel structures, stairs, pipes and funnels in the more than 30 meter high tower, it is like entering the world of Escher. The new Persvoeder Fabriek was built in 1956 for the production of cattle cakes. During the renovation of the factory, everything in the NPF Toren was left intact. This makes it the perfect venue for everything that is not common: for example for that one daring presentation or power speech. The machines that are still fully present provide a unique setting for your event.

THEATERZAAL

The modern **Theaterzaal** opened in 2018 and features the latest theater techniques, including full, sustainable LED theater lighting.
